

### **REMARKS**

Further to Applicant's fully-responsive and timely filed Amendment of August 28, 2006, Applicants respectfully request that the specification be amended to include an updated cross-reference to Application No. 08/882,561 by including its now-known Patent No. 6,088,038. Applicants also request that this portion of the specification be amended to specify that this application also is a continuation-in-part of Application No. 08/884,411, filed June 27, 1997, now U.S. Patent No. 6,108,442. Such Application was incorporated by reference in the originally filed specification at the paragraph beginning at page 10, line 15. The 08/884,411 application issued as U.S. Patent No. 6,108,442 on August 22, 2000, which is subsequent to the March 27, 2000 filing date of the present application. Accordingly, the present application was filed during the pendency of Application No. 08/884,411. In addition, the present application was filed prior to November 29, 2000 and is not subject to the requirements of 37 C.F.R. 1.78 (a)(2)(ii) that a cross-reference to a prior-filed application be submitted within the later of four months from the actual filing date of the subject application or 16 months from filing date of the 08/884,411 application. See MPEP 201.11.

In addition, Applicants submit herewith an Information Disclosure Statement providing a copy of the reference cited in the specification at page 25, line 19.

In view of the foregoing supplemental amendments and remarks, Applicants respectfully request the allowance of the present application.

Respectfully submitted,
